

PV-41 One-Way Degassing Valve

PV-41 One-Way Degassing Valve

The PV-41 is the ideal solution for degassing a rigid and can coffee packaging. The PV-41 effectively vents CO₂ gas build-up while sealing-out environmental oxygen, moisture, and contaminants. PLITEK's one-way degassing valves are proven to out-perform every other degassing valve on the market today.

Protected under US Pat. #7,178,555

PV-41 Features

- > Highest degassing performance
- > Compact form factor
- > Metalized surface
- > Permanent adhesive system
- > Easy external application
- > No-tear release liner

PV-41 Specifications

Dimensions (WxL)	0.787" x 0.787"
Thickness*	0.020"
Release liner	0.002" PET
Roll count	15,000
Case count	150,000
Opening pressure	0.10 - 0.28 psi
Closing pressure	0.03 - 0.16 psi
Application	External, Self Adhesive

**Thickness does not include release liner*
